### The Bulletin.

Norwich, Tuesday, Jan. 23, 1917.

THE WEATHER. The winds along the north Atlantic east will be strong west, diminishing, addle Atlantic coast strong north-

During the last 24 hours there were general snows in the north borders states from Minnesota eastward to New England, rain and snow in the middle Atlantic states.

The indications are that the weather will be generally fair Tuesday and Wednesday in the north states east of Wednesday in the north states cast of the Mississippi River.

The temperature will be lower Tues-day in the Atlantic states. It will rise Wednesday in the middle Atlantic and New England states.

The newly completed Guild room of St. Andrew's church was filled to its capacity Monday evening when the Men's club of the parish gave their annual vaudeville entertainment. The entertainment was furnished by local talent and each performer received a large amount of merited applause. The violin solos by Herbert Smith were exceptionally well rendered and showed a careful study and understanding of the instrument. Three local boys, Arthur Rydholm, Thomas Sears and William Hall, were warmly applanded for their fun-producing sketch, The Skeleton Minstrels. The program closed with an address by R. C. Plaut. The programme was as follows: Overture, Geer's orchestra; America; soo, William Dalay and the great hero song, for four and twenty elders, Wrastling Jacob and the great hero song, the great hero song, and the great hero song, the great hero song, and the great hero song, the great hero song, and the great hero song, and the great hero song, the great hero song, and the great hero song, the great hero song, and the great hero song, the great hero song, and the students, and urban alike—more friendly relations.

Hampton Institute is an industrial village with some 1400 students, 200 testions, the latter being a model negro community. St. Helena's population is composed of about 6,000 negroes and less than 50 white people. The primipulation is composed of about 6,000 negroes and less than 50 white people. The primipulation is composed of about 6,000 negroes and less than 50 white people. The primipulation is composed of about 6,000 negroes and less than 50 white people. The primipulation is composed of about 6,000 negroes William Hall, were warmly applauded for their fun-producing sketch. The Skeleton Minstrels. The program closed with an address by R. C. Plaut. The programme was as follows: Overture, Geer's orchestra; America; soo, William Delaney; duet, mandolin and William Delaney; duet, mandolin and William Delaney; duet, mandolin and Herbert wights. William Delaney; duet, mandolin and violin, George Humbolt and Herbert Smith; trombone solo, Harry W. Ward; feats of magic, Prof. La Montague; violin solo, Kiss Me Again, Herbert Smith; Skeleton minstrel act, Arthur Rydhom, Thomas Sears and William Hall; trombone and saxophone duet, Harry Ward and George E. Geer; address, R. C. Plaut. Following the entertainment refreshments were served and a social hour ments were served and a social hor was enjoyed.

Disregards Auto Law. A motorist who in disregarding the traffic rules in passing a standing rolley car, narrowly averted a seri ous accident by turning his car into a side street to avoid hitting several passengers getting on the trolley. A trolley bound for Franklin square stopped at Twelfth street to take on the few passengers walting for the car when the automobile approached. car when the automobile approached, going the same way as the car, and without slowing down tried to pass the car when a passenger alighting al-most stepped in front of the machine which would have struck the person if the driver had not turned quick in-to Twelfth street. Automobile drivers along Central avenue seem to have not the slightest regard for the rights

Finance Committee Meets. The finance committee of the Federated church met Monday evening at the home of Mrs. W. A. Lund. The regular business wa transacted and the reports of the penny social were read and accepted. There was a good attendance.

The Ladies' Aid of the Federated church will meet with Mrs. Willis Hill this afternoon for their regular ses-

The Sunday school instruction class will be held in the vetry of the church Tuesday afternoon. Rev. A. W. Burdon will instruct the class.

#### NO NEED TO FEAR BALDNESS

Tells How to Make Hair Grow Thick and Lustrous on Bald and Thin Spots.

Thousands of men and women are growing baid every day and don't know the reason why. This is indeed a pity, says a hair specialist, who states that baldness usually comes from carelessness, and that anyone who gives the hair just a little atten-tion should always have an abundance tion should always have an abundance of good, healthy hair. Dandruff and dirt cause baldness by clogging the pores in the scalp, and giving the dan-druff germs fertile ground for prolific

The treatment is very simple: remove the dirt by shampooing at least once in ten days and destroy the danonce in ten days and destroy the dandruff germs by frequently applying a little of the real Parisian Sage, a most efficient preparation that the best druggists everywhere are now recommending as one of the quickest and safest treatments to surely stop itching scalp and falling hair, remove all dandruff and to properly nourish and invigorate the hair roots.

Parisian Sage is also the discriminating woman's favorite hair dressing because it gives her hair a softness and luster that fascinate and compel admiration. A generous bottle costs admiration. A generous bottle costs but little from Lee & Osgood Co., who guarantee it to you.

LIBRARY WILL CIRCULATE

GAMES AND PUZZLES New Plan Originated by Wheeler Library at North Stonington. On Wednesday, weather permitting, the librarian of the Wheeler library at North Stonington will make her third trip to fhe Pendleton Hill district

picture puzzles and anagrams. Not only will such games and puzzles

prove a boon to young people who per-haps are not acquainted with such home games as authors, chess, par-chesi, etc., but it will make it possible for people to borrow games for any for people to borrow games for any special occasion.

The following books have recently been added to the library:

Bacon, Japanese Girls and Women:
Somderville, Story of the Discontented Elephant: De Quincey, Essays; Roosevelt, African Game Trails; Seton, Nimrods' Wife: Wormeley. Our Domestic Animals: Bannerman, Story of Little Black Sambo: Rauschenbush Little Black Sambo; Rauschenbush, Christianity and the Social Crisis; Crothers Among Friends: Dunne, Mr. Crothers, Among Friends: Dunne, Mr. Dooley Says; Kipling, Collected Verse; Lincoln, Cap'n Warren's Wards; Peattle, Lotta Embury's Cousin; Schauffler, Memorial Day; Scott, 13 Washington Square; Stories of the Norsemen; Van Vorst, Big Tremaine; Chubb, Teaching of English; McMurry, Elementary School Standards; Monroe, Text-book in the History of Education; Robinson, Readings in Medieval History; Tappan, Story of the Greek People; Newton, Once Upon a Time in Connecticut.

Y. M. C. A. NOTES.

Attractive Events Planned for in Athletic Meet-Contests in Junior Class End Today.

Physical Director Crosby has com-pleted arrangements for the track meet that will take place between the local Y. M. C. A. and New London on Wed-nesday night. The events will be runnesday night. The events will be run-ning high jump, three standing broad jumps, pole vault, 12 pound shot put, six potato race, regular relay race and medley race. Suitable prizes will be offered to the winners, and preliminary to the meet there will be a volleyball contest between the business men's classes of the two associations. For the past two years the New London business men have captured this event business men have captured this event, but the local men are determined to turn tables this year.

New London will send here 15 to 18 entries, while the local association will have an entry list of about 15.

The athletic contest that has been conducted between members of the junior class will conclude this afternon. Two teams are battling for first place and it is expected there will be keen rivalry for the championship. The team captains follow: Vernon Randall, lossph Hartlay Louis Covers and the Joseph Hartley, Louis Covey and John Young. At the weekly boys hour this week reels of moving pictures will be

ASK FOR and GET HORLICK'S THE ORIGINAL MALTED MILK

workman. Two fine arts are taught
—namely, the art of knowing how to
live and a very tuneful and rythmical song. The Roads and the Mountains Shall All Flee Away, Mr. Leavens made a very happy plea for contributions, large and not so large.

The closing number was to have
been Swing Low Sweet Chariot, but
the quartet was forced to respond to
an encore and gave by request, Nobody Knows What Trouble I see.

The Hampton quartette is the best
Negro quartette in America and is
known from coast to coast for their
singing of the plantation melodies or
spirituals of the South.

"This music is", as Mr. Walter
Damrosch has said, "unique and inimitable, and is the only music of
this country, except that of the Indians, which can claim to be folk music.
In it the Negroes pour out their joys
and sorrows in naive, but wonderfully
moving fashion; and in the face of
such testimony of emotional and esthetical beauty, who dare deny them
wider future possibilities in the great
work of liberation of mind and soul,
which is now going on?"

Hampton Institute trained the late
Prof. Booker T. Washington. Today
it is sending Major Robert R. Moton,
another graduate, to take up Dr.
Washington's work at Tuskegee. For
nearly fifty years Hampton has been
sending into the South and West
bands of well-trained, Christian leaders to help colored and Indian people
live richer and better lives.

Nearly nine thousand graduates and
former students, who have felt the influence of Samuel Armstrong and
Hollis Burke Frissell, have been
spreading the Hampton idea of education—education for service.

This army of leaders has literally
transformed the lives of thousands and
has brought to hundreds of communities—rural and urban alike—more
friendly relations.

thing very different.

Here a select group of students actually work in the plant for a considerable period of time and worf under the direction of a professor of the Institute. They move around from one plant to another in regular cycle, and so get a training which is very different from anything possible in any other system that has been devised. Those of the students who have shown a special aptitude for reservch will, after graduation, return to the plant in which they are specially in-

tet.

Mr. Frank Whipple of Hartford, field secretary for Hampton, spoke most earnestly of the work being accomplished there, the aims and ideals, Girls receive thorough training in

cooking, sewing, laudry work, gard-ening and methods of teaching.

BARD UNION COMPANY HELD ANNUAL MEETING. Directors and Officers Chosen-C. L.

Hubbard Elected President. The annual meeting of the Bard the librarian of the Wheeler library at North Stonington will make her third trip to the Pendieton Hill district with the book wagon. She will have a large assortment of books and magazines, as before.

The library is trying a rather povel with the company. The following directors were elected: Charles L. Hubbard, Arthur H. Brewer, Calvin H. Frisbie, Charles I. Hubbard, Arthur H. Brewer, Calvin H. Frisbie, Charles Tyler Bard and Archibald

The library is trying a rather novel experiment. Beginning this week there will be circulated from the library, in the same way in which books are cirbard; treasurer, Calvin H. Frisbie secretary and general manager, Charlos Tyler Bard

The annual reports showed that the usiness is substantial and that 1916 was a prosperous year. NOTED SPEAKERS AT BANQUET

the best that are to be found any

As the last speaker of the evening loastmaster Selden introduced Capt. F. C. Billard of the United States

Coast Guard, Fort Trumbull, New London. Captain Billard said he considered it an honor to be invited to address such a notable gathering. You gentlemen are members of the Chamber of Commerce, he said. The term Chamber of Commerce seems to me to

indicate palatial marble halls. It incindes those men who are progressive and who foresee. You gentlemen are business men. We are all more or less

buiness men. The world today partic-ularly honors business men, men of

Proposes Plan of Federal Co-operation With States. The Smith-Hughes vocational education bill, which played so large a part in the addresses at the Eastern Conof supplying, on the educational side, the industrial needs of the nation. Now it goes without saying that such an institution, if it is really to supply these needs, must have the active cooperation of far sighted business men who know what the industries are toin the addresses at the Eastern Con-necticut banquet Monday evening, pro-poses a plan of federal co-operation with the states along the following lines: (a) payment of salaries of teachers, supervisors or directors of agricultural subjects, (b) payment of salaries of teachers of trade, home economics and industrial subjects, and (c) preparing teachers, supervisors who know what the industries are to-day and have a clear vision of what they will be in the future. You will perform a national duty if you make practical suggestions for the develop-ment of the Institute of Technology, and to enable you to do so I may tell you some of the things that are being done now and some of the things that are about to be begun. We recently purchased a tract of 50 acres on the Charles river embankment and have expended about seven millions of doi-lars in developing that site with build-(c) preparing teachers, supervisors and directors of agricultural subjects, and teachers of agricultural trade, in-dustrial and home economic subjects. For this purpose there would be three funds created by annual appropriations of \$500,000 each with annual increments which in the case of (a) and (b) above, would amount in 1926 to \$3.000,000, and in the case of (c) to expended about seven millions of doi-lars in developing that site with build-ings and equipment. The great series of laboratories that have been erected are in many respects unrivalled in the world, and there is certainly no school anywhere whose laboratories comprise a wider range in the field of engineer-ing and allied subjects. There are laboratories for the testing of mater-rials, steam laboratories, gas engine \$3.000,000, and in the case of (c) to \$1,000,000 in 1921, and be continued annually thereafter at those figures. States receiving the benefit of the federal appropriations would be required of contribute an amount equal to that furnished by the federal government, the joint funds, in the case of the states, to be disbursed by the state through a board of vocational education.

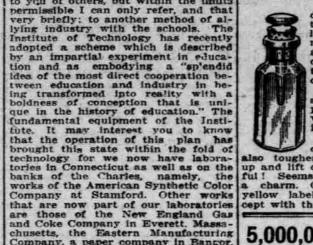

state through a board of vocational education.

The allotment of the funds above indicated would be respectively on the basis of rural population, urban population and total population of the state as compared with the total population of the same class of the United States. In the case of funds (a) and (b) above the minimum allotment prior above the minimum allotment prior to 1924 would be \$5,000 and \$10,000 thereafter, and in the case of fund (c) \$5,000 prior to 1920 and \$10,000 thereafter. For the purpose of providing for allotments under the different funds the following annual appropriations are made:

Year Fund A.

laboratories, with due regard, of course, to the all-important question of manning them properly, there is scarcely a practical problem with which the institute would not be in a position to cope. The primary purpose of these laboratories and of the institute as a whole is, of course, to train men who can be useful to industry, but one of the special needs of industry that will inevitably be of far greater importance in the future than it has been in the past is the need of investigation and research to solve its special problems. As you know, many of the great business organizations of the country have their own research departments and find it profitable to spend huge sums annually on their maintenance. The Institute of Technology, amongst other things, must supply men for service in Institute of Technology, amongst other things, must supply men for service in these research laboratories and the demand will soon grow out of all proportion to the supply. These great research laboratories are, of course, costly affairs and many of the smaller concerns will soon find themselves in a specially difficult position. They will not be able to afford research laboratories and they will go under in competition with others unless through \* Thereafter at that figure. \*\* Thereafter \$27,000. A state might accept the benefits of all or any one of the funds above mentioned with the limitation that no state after June 30, 1919, may avail itself of fund (a) unless it shall have taken advantage of at least the minimum provisions of fund (c) nor thereafter receive the benefits of fund (b) TRY IT AND SEE!

Lift your corns or calluses off fingers! Doesn't hurt a bit!

A noted Cincinnati chemist discovered a new ether compound and called it freezone and it now can be had in tiny bottles as here shown for a few cents from any drug store.

You simply apply a few drops of freezone upon a tender corn or painful callus and instantly the soreness disappears, the n shortly you will find the corn or callus so loose that you can just lift it off with the fingers.

No pain, not a bit of No pain, not a bit of soreness, either when applying freezone or afterwards and it doesn't even irritate skin. irritate skin.

Hard corns, soft corns or corns between the toes, also toughened calluses just shrivel up and lift off so easy. It is wonderful! Seems magical. It works like a charm. Genuine freezone has a yellow label. Don't accept any except with the yellow label.

### 5,000,000 Corns Lifted Right Off!

chusetts, the Eastern Manufacturing Company, a paper company in Bangor. Maine, the Carborundum Company at Niagara Falls, New York, and the Atias Portland Cement Company at Allentown, Pennsylvania, so that you see that we now have great laboratories in five different stations. In each of these industrial plants we have a professor permanently resident in the plant, who, with his assistants, is responsible for the use of the plant as an educational machine, of course under the general direction and in intimate cooperation with the manavers Try 2 Drops of Magic "Gets-It" There's a wonderful difference be the way they used to try to get rid of it only four or five years ago. "Gets-It" has revolutionized corn his-tory. It's the only corn remedy today mate cooperation with the manavers of the plant. Of course the plan has long been followed of taking students on brief visits to different plants but the scheme that I refer to is something very different.

will, after graduation, return to the plant in which they are specially interested or in which a special opportunity presents itself, and with the Institute's professor who directs instruction in that plant, carry on research and investigations for the direct benefit of the industry concerned. I hope that this brief sketch will at least serve the purpose of indicating the trend of things in the school. The best brains of the country in the world industry must be concerned at least occasionally with the problems of the scientific schools. In the industrial welfare of the future, science will surely be in the saddle and no nation, however well placed, can survive in the struggle by the use of any other the struggle by the use of any other weapons than scientific weapons For the needs and ambitions of this country our schools of applied science must by E. Lawrence & Co., Chicago, Iill. a bottle, or sent on receipt of price by E. Lawrence & Co., Chicago, Iill.

> inless it shall likewise have availed itself at least of the minimum appro priation provided under fund (b). Provision is also made for a federa poard for vocational education to consist of the postmaster general and the secretaries of the interior, agriculture, commerce and labor. The commission-er of education would be the executive officer of the board, which would, through the respective departments, conduct the necessary investigations to onduct the necessary investigations to

days in any year.

In the form above indicated the bill passed the senate, 7-31-16. The dates

bill which had previously reported from its committee on education on 2-12-16. (H. R. 11250.) 2-12-16. (H. R. 11250.)

The particulars in which the house bill differes from the senate measure are indicated below:

There is a provision that not more than 20 per cent, of the money appropriated under fund (b) above (payment of selecters of trade home.

of salaries of teachers of trade, home economics and industrial subjects) may be expended in any year on salaries for teachers of home economics. The personnel of the federal board of vocational education would consist of the United States commissioner of education and four citizens appointed by the president who would receive a salary of \$5,000 per annum each. These members of the board would represent respectively the following interests: (1) manufacturing, (2) commerce (ther than manufacturing), (3) labor, and (4) agriculture. Members would serve for normal terms of four years and annually select their chairman from their own number.

The specialists and advisory board

their own number.

The specialists and advisory board provided in the senate bill are omitted from the house bill.

The vocational education bill is now in its final stages. The house passed the bill on Jan. 2 and on Jan. 13 named conferences. The senate passed named conferees. The senate name its conferees on Jan. 11.
